| linkedin.com/in/fajardwiutomo/ | github.com/fajarutamaa

I have a diploma in computer control engineering and a graduate of Binar Academy Bootcamp stack Backend Engineering. Have good knowledge and skills in working with various frameworks, languages, and tools through my projects and internships. Currently, I am looking for opportunities to continue developing my skills in the Backend field. I also do not rule out the possibility of getting involved and being interested in other fields.
